

SCAG POWER EQUIPMENT

SERVICE INFORMATION SHEET 183

Engine Specification Number Chart

In order to give better service to your customers and to reduce parts look up time, we have revised the Engine Specification Number Chart. This chart is for reference when an engine part or a replacement engine is needed. Contact your nearest engine supplier for parts and replacement engines.

This chart is for reference only. Scag Power Equipment does not offer engines as replacement parts. All specification numbers are subject to change per the individual engine manufacturer.
